

# OUR Commitment

---

The school located at Nifas Silk sub-city, Kebele 09/14 provides education to 2,622 students. Of the total students, 262 are orphans—93 males and 169 females with education status of orphan vulnerable children (OVC) ranging from grade 1 to 8.

VoA has taken the initiative in helping the 262 orphans through provision of material and moral support.

# Vision on Africa

(VoA)

---

**You can make a  
difference with VoA!**

Vision on Africa (VoA) is a non-profit organization incorporated in the United States of America. Our mission is to implement health, education, poverty-reduction, and self-governance programs that move toward sustainable development in Africa and to provide cultural adjustment/skill enhancement workshops to African immigrants in the Washington, D.C. metropolitan area. We are serving the African community by forging strategic partnerships with governmental and nongovernmental organizations to maximize development impact of projects and programs.

VoA has recently established a Mother and Child Integrated Health Center in Yeka Sub-City, Addis Ababa, Ethiopia.

The center currently provides immunizations, antenatal care, counseling, family planning, community integrated management and child illness (IMCI), with special emphasis on the prevention of mother-to-child transmission (PMTCT) of HIV/AIDS.

Other on-going VoA projects include:-

1. Community Integrated Management Child Illness (IMCI) program, capacity building/skill enhancement and self sustainable development projects. These projects are executed in collaboration with the Yeka sub-city Health Bureau and The Fray Reproductive Health and Anti-AIDS Youth Association.
2. Assisting 262 orphans of the Fitawrari Lake Adgeh Primary School located in Addis Ababa by providing school material and moral support.
